How to Configure My Account Settings

WooCommerce · https://gloriathemes.com/docs/digimart/woocommerce/how-to-configure-my-account-settings/

The My Account settings allow you to customize the login and registration experience with design and usability improvements.

You can configure these options from:

Appearance → Customize → WooCommerce → My Account

Layout & Behavior

- **Tabs** – Enable or disable tabbed layout for Login and Register forms.
- **Tabs Style** – Choose from Style 1 to Style 6.
- **AJAX Login & Register** – Enable login/register without page reload.
- **Username Field** – Show or hide the username field (in addition to email).

Text Settings

You can customize all texts shown in login and registration forms:

- **Login Heading**
- **Login Description Text**
- **Login Additional Text**
- **Register Heading**
- **Register Description Text**
- **Register Additional Text**

WooCommerce Account Settings

For general account behavior and registration settings, you can access WooCommerce's default settings from:

WooCommerce → Settings → Accounts & Privacy

Here you can manage:

- User registration options
- Guest checkout
- Password creation and account behavior

Tip: Combine theme settings with WooCommerce account settings to fully customize the user login and registration experience.
