How to Configure Bundle Products

WooCommerce · https://gloriathemes.com/docs/shinao/woocommerce/how-to-configure-bundle-products/

The Bundle Products feature allows you to display related or complementary products together on the single product page (e.g. "Complete the look").

You can configure the display settings from:

Appearance → Customize → WooCommerce → Bundle Products

Display Settings

- **Style** – Choose between Style 1 or Style 2
- **Position** – Select where the bundle will appear:
  - Before Tabs
  - After Tabs
- **Title** – Section heading
- **Description** – Optional description text

Product Elements

- **Image** – Show or hide product images
- **Price** – Show or hide product prices
- **Rating** – Show or hide ratings

Button Settings

- **Button Text** – Customize button label
- **Button Color**
- **Button Style**
- **Button Size**

- **Button Shape**

How to Add Bundle Products

To assign bundle products to a specific product:

Edit or create a product and go to:

Product Data → Linked Products

Inside this tab, you will find the **Bundle Products** field.

Select multiple products to include in the bundle.

These products will then be displayed together on the single product page as a bundle or "complete the look" section.

Tip: Use bundle products to increase average order value by promoting complementary items together.
