How to Configure WooCommerce Sidebar Settings

WooCommerce · https://gloriathemes.com/docs/liore/woocommerce/how-to-configure-woocommerce-sidebar-settings/

You can manage WooCommerce sidebar settings from:

Appearance → Customize → WooCommerce → Sidebar

Shop Sidebar

- **Shop Sidebar Position** – Choose the position of the sidebar on the shop page (e.g. left or right).
- **Sidebar** – Select which widget area (sidebar) will be used for the shop page.

Product Sidebar

- **Product Sidebar** – Select the sidebar for single product pages.

Note: The product sidebar is only visible when **Layout Style 3** is selected in:

Appearance → Customize → WooCommerce → Single Product → Layout Style

Tip: Use sidebars to display filters, promotions, or additional content to enhance user experience on shop and product pages.
