Global Footer Settings

Footer · https://gloriathemes.com/docs/noxe/footer/global-footer-settings-2/

Global footer settings affect all pages and determine your default footer settings. If you have not defined a custom footer setting for a page, these settings will apply.

Step 1 - Navigate to the Appearance > Customize page from the WordPress dashboard.

Step 2 - Open the 'Footer' pane.

Step 3 - You can customize all global footer settings from this section.

You can learn more about the panes in the theme settings article.
