How to Enable AJAX Shop Features

WooCommerce · https://gloriathemes.com/docs/liore/woocommerce/how-to-enable-ajax-shop-features/

You can enable the main AJAX shop features from:

Appearance → Customize → WooCommerce → General

AJAX Settings

- **AJAX Shop** – Enable AJAX-based sorting, view switching, and product count updates on the shop page without reloading the page.
- **AJAX Add to Cart** – Adds products to the cart without reloading the page for a faster and smoother shopping experience.

Enable both of these options to improve the shopping experience and make product browsing feel smoother.

AJAX Pagination

On the same panel, you can also configure pagination behavior.

- **Pagination Type** – Select **AJAX Pagination** to load products dynamically without refreshing the page.

Tip: Enabling AJAX Shop, AJAX Add to Cart, and AJAX Pagination together creates a faster and more seamless store experience for your customers.
