How to Configure the Free Shipping Bar

WooCommerce · https://gloriathemes.com/docs/benson/woocommerce/how-to-configure-the-free-shipping-bar/

The Free Shipping Bar informs customers how much more they need to spend to qualify for free shipping.

This feature helps increase average order value by encouraging users to add more products to their cart.

You can configure it from:

Appearance → Customize → WooCommerce → Free Shipping Bar

General Settings

- **Free Shipping Bar** – Enable or disable the feature.
- **Amount** – Set the minimum cart total required for free shipping.

Display Locations

You can choose where the bar will appear:

- Popup Cart
- Side Cart
- Cart Page
- Checkout Page

You can enable or disable each location individually.

Text Settings

- **Before Text** – Message shown before reaching the free shipping threshold.

Example:

```
Add [amount] more to get free shipping!
```

- **After Text** – Message shown after reaching the free shipping threshold.

Example:

```
Congratulations! You have free shipping!
```

The `[amount]` placeholder dynamically shows the remaining amount needed.

Tip: Use clear and motivating messages to encourage customers to reach the free shipping threshold.
