How to Configure Action Buttons on Single Product Page

WooCommerce · https://gloriathemes.com/docs/digimart/woocommerce/how-to-configure-action-buttons-on-single-product-page/

You can manage the Action Buttons displayed on the single product page from:

Appearance → Customize → WooCommerce → Action Buttons

These buttons appear in the product detail section and allow users to interact with the product.

Action Buttons

You can control which buttons are visible and their order:

- Contact
- Size Guide
- Wishlist
- Compare
- Custom Buttons

You can reorder them or enable/disable each button using the eye icon.

Position

- **Position** – Choose where the buttons will appear:
  - Below Product Gallery
  - Product Summary

Contact Button

- **Contact Button Text** – Customize the button label.

- **Contact Page** – Select the page where users will be redirected.

Custom Action Buttons

You can create additional custom buttons using a repeater field.

Click **Add New** to create a button. Each item can include a title and a link.

You can add as many custom buttons as needed and use them for promotions, external links, or special actions.

Tip: Use action buttons to enhance user interaction by providing quick access to important features like contact, size guides, or external resources.
