How to Access and Manage WooCommerce Settings

WooCommerce · https://gloriathemes.com/docs/ustone/woocommerce/how-to-access-and-manage-woocommerce-settings/

WooCommerce provides a comprehensive set of built-in settings to manage your online store, including products, payments, shipping, accounts, and more.

You can access all core WooCommerce settings from:

WP Admin → WooCommerce → Settings

Main WooCommerce Settings Tabs

Inside the WooCommerce Settings panel, you will find the following sections:

- **General** – Store location, currency, and general store options
- **Products** – Shop page, product settings, inventory, and measurements
- **Shipping** – Shipping zones, methods, and rates
- **Payments** – Payment gateways such as PayPal, Stripe, etc.
- **Accounts & Privacy** – User registration, login, and privacy settings
- **Emails** – Email notifications and templates
- **Advanced** – Page setup (Cart, Checkout, My Account) and endpoints

Important Note

Many essential store features such as Cart, Checkout, and My Account pages are managed from the **Advanced** tab.

Make sure these pages are properly assigned for your store to function correctly.

Official WooCommerce Documentation

For detailed explanations of all WooCommerce core features, you can refer to the official documentation:

https://gloriathemes.com/go/woocommerce-docs

Tip: Theme settings control the design and layout, while WooCommerce settings control the core store functionality.
