How to Configure Single Product Settings

WooCommerce · https://gloriathemes.com/docs/liore/woocommerce/how-to-configure-single-product-settings/

You can manage the single product page settings from:

Appearance → Customize → WooCommerce → Single Product

This panel includes a wide range of options to control the layout and elements of individual product pages.

Layout & Tabs

- **Layout Style** – Choose between Style 1, 2, or 3 (affects layout width and structure).
- **Tabs Layout** – Tabs or Accordion layout.
- **First Item Open by Default** – Keeps the first accordion item open on page load.

Product Information

- **Review Summary**
- **Review Average**
- **Category**
- **Rating**
- **Rating Score**
- **Rating Total**
- **SKU**
- **Price**
- **Stock Status**
- **Short Description**
- **Stock Progress Bar**

You can enable or disable each element individually.

Social Sharing

- **Social Sharing** – Enable or disable sharing buttons
- **Social Sharing Title**
- **Social Sharing Color**
- **Social Sharing Shape**

Add to Cart Settings

- **Cart Button Color**
- **Cart Button Style**
- **Cart Button Size**
- **Cart Button Shape**
- **Quantity Type** – Input or select
- **Quantity Style** – Style 1 to 9

Product Sections

- **Related Products** – Enable/disable
- **Related Products Description**
- **Recently Viewed Products** – Enable/disable
- **Recently Viewed Products Description**

Custom Elementor Block

- **Custom Elementor Block** – Enable to add a custom section
- **Custom Elementor Block Template** – Select a saved Elementor template
- **Custom Elementor Block Position** – Choose where it appears on the page

To create Elementor templates, go to:

WP Admin → Templates → Saved Templates

Create a new template and design your custom section using Elementor.

Custom Product Tabs

You can add additional tabs globally using a repeater field.

Each tab includes:

- **Title**
- **Text Content**
- **Elementor Template**

These tabs will be added after the default WooCommerce tabs and will appear on all products.

Tip: Use custom tabs and Elementor blocks to enrich product pages with additional content such as FAQs, size guides, or promotional sections.
