Step 1 - Navigate to the Settings > General page. from WordPress dashboard.

Step 2 - You will see general settings in this page. Site title, tagline, site url, timezone, etc. settings here.

Step 3 - Navigate to the Settings > Reading page. You can customize homepage settings in the this page. You can define a page for homepage from this.

Step 4 - Navigate to the Settings > Permalink page. WordPress offers you the ability to create a custom URL structure for your permalinks and archives. Custom URL structures can improve the aesthetics, usability, and forward-compatibility of your links. A number of tags are available, and here are some examples to get you started.

You can also customize other settings in the subpages of the Settings.
