How to Add Custom Background to Page

Customization · https://gloriathemes.com/docs/arven/customization/how-to-add-custom-background-to-page/

Here’s how to add a custom background using **Customizer**, **Elementor**, **WPBakery**, or **Gutenberg**, explained step by step:

1. Adding a Background with the Customizer

The Customizer is WordPress's built-in tool for styling your site.

Steps:

- **Step 1:** Log in to your WordPress dashboard.
- **Step 2:** Go to **Appearance > Customize**.
- **Step 3:** Find the **Color** > **Background** or **Background Image** option (this may vary by theme).
- **Step 4:** Click **Select Image**, then upload or choose an image from your Media Library.
- **Step 5:** Adjust settings such as position (center, left, right), repeat (tile or no-repeat), and attachment (fixed or scroll).
- **Step 6:** Click **Publish** to save your changes.

2. Adding a Background with Elementor

Elementor allows you to easily set backgrounds using its drag-and-drop editor.

Steps:

- **Step 1:** Open the page you want to edit and click **Edit with Elementor**.
- **Step 2:** Add a new section or select an existing one.
- **Step 3:** In the left panel, go to the **Style** tab.
- **Step 4:** Under **Background**, choose a **Color**, **Image**, or **Gradient**.
- **Step 5:** Customize options like position, size, and attachment.
- **Step 6:** Click **Update** to save your changes.

3. Adding a Background with WPBakery

WPBakery offers flexible options for adding custom backgrounds to rows.

Steps:

- **Step 1:** Open the page you want to edit and click **Edit with WPBakery**.
- **Step 2:** Add a new row or edit an existing one by clicking the **Row Settings** icon.
- **Step 3:** In the **Row Settings**, go to the **Design Options** tab.
- **Step 4:** Upload or select an image under **Background Image**.
- **Step 5:** Adjust settings like position, repeat, and attachment.
- **Step 6:** Save your changes and click **Update**.

4. Adding a Background with Gutenberg

Gutenberg makes it simple to add custom backgrounds using blocks.

Steps:

- **Step 1:** Open the page you want to edit with the **Gutenberg Editor**.
- **Step 2:** Add a **Group Block** or select an existing block.
- **Step 3:** In the right **Block Settings** panel, choose **Background Color** or **Background Image**.
- **Step 4:** Upload an image or pick a color.
- **Step 5:** Check the layout of the content within the block and make any adjustments.
- **Step 6:** Click **Update** to save your changes.
