How to Configure Header Info Boxes

Header · https://gloriathemes.com/docs/benson/header/how-to-configure-header-info-boxes/

Info Boxes allow you to display custom content in the header such as contact details, support info, or promotional messages.

You can configure them from:

Appearance → Customize → Header → Info Boxes

Adding Info Boxes

Inside the **Info Boxes** section, you will find a repeater field where you can add multiple items.

Click **Add New** to create a new Info Box. Each item includes the following fields:

- **Title** – Main heading of the info box
- **Text** – Description or additional information

- **Link** – Optional URL for the box
- **Link Target** – Open in new tab or same frame
- **Icon** – Upload an image/icon

You can add as many Info Boxes as needed depending on your layout.

Enable in Header

After creating your Info Boxes, you need to enable them in the header:

Appearance → Customize → Header → Header General

- **Info Boxes** – Enable this option to display them in the header.

Tip: Info Boxes are ideal for displaying contact information, delivery details, working hours, or trust signals in the header.
